

# Combi TF

## Remote Control & Flash Trigger

The Combi TF combines two products in one - a wireless remote shutter release, plus a remote flash trigger.

### Wireless remote shutter release

- As a remote control, the Combi TF allows wireless control of the camera's shutter release, auto focus, continuous shooting, bulb mode and 4 second timer delay trigger.
- Equipped with interchangeable cables for all major brands, the Combi TF is the ideal remote control for practically all DSLR Cameras.

### Remote flash trigger

- Remote trigger of flash is also possible with the Combi TF. Using multiple receivers, several portable flash units can be fired simultaneously, along with triggering studio lights.
- Ideal for a wireless studio environment.

Camera Connectors

Available for  
Canon, Nikon, Olympus &  
Panasonic

# Specialised photography such as sporting, wildlife, landscape plus many more are enhanced using the Combi TF.

The Combi TF uses high-tech, reliable FSK 2.4GHz frequency, which is a worldwide licencefree technology

## Accessories for Combi TF

Accessories are also available for the Combi TF.

### Receiver

Additional receivers enable you to trigger multiple flash units and studio lights simultaneously.

### Studio Light Cable

A short, 150mm, studio Light Cable attaches the Combi TF receiver to the studio light.

Place the transmitter on the camera shoe, the studio light is triggered by use of the shutter release on the camera.
